

ABSTRACT OF THE DISCLOSURE

1 A liquid crystal display comprises a liquid crystal
2 display panel, a lamp unit including a lamp and a lamp
3 holder, a light guide plate, and a case assembly. The
4 case assembly includes a rear case behind the liquid
5 crystal display panel. The rear case has the lamp holder
6 and light guide plate on a surface thereof in a manner
7 to hold them in operative relationship, with the lamp
8 holder kept independent from the light guide plate.
